

## **AMENDMENTS TO THE SPECIFICATION**

### **Please amend paragraph [0026] as follows:**

[0026] Client 120 and database server 126 are coupled to web server 124 across network 122. Network 122 can generally include any type of wire or wireless communication channel capable of coupling together computing nodes. This includes, but is not limited to, a local area network, a wide area network, or a combination of networks. In one embodiment of the present invention, network 122 includes the Internet. Client 120 and database server 126 communicate with web server 124 as described in the related application by Bhagat V. Nainani, Neerja Bhatt, Shailendra K. Mishra, Krishnan Meiyyappan, Namit Jain, and Wei Wang entitled, "Method and Apparatus to Facilitate Accessing Communication Queues Using a Public Network," having serial number 10/027,100-TO-BE ASSIGNED, and filing date 19 December 2001-TO-BE ASSIGNED (Attorney Docket No. OR01-07501), which is incorporated herein by reference.
